## SUPPLEMENT

- 25X1A6a

comment: It is not known what relation they bear to actual production.)

- a. Total production reached 101.7% of schedule.
- b. Production of copper concentrate reached 118%.
- c. Production of spirit concentrate reached 105%.
- d. Smelting of raw copper 119% (100% more than in 1945).
- e. Production of cathode copper reached 107%.
- f. Production of silver reached 102%.
- g. Production of gold reached 119%.

Six training courses are being conducted in these mines and 382 workers have already received higher designations.

2. Special courses for the training of Communist leaders have been organized in the Trepcja mines, Zvecan factory, and Stari Trg mines. The study of the Russian language is obligatory and instruction is given after each of the three shifts. In Trepcja there are 14 Soviet engineers working as instructors and 40 technicians who are teaching individual courses.

3. The wage scale runs as follows:

For skilled labor	14 - 18 Dinars per hour
For semi-skilled labor	10 - 13 Dinars per hour
For unskilled labor	8 - 10 Dinars per hour

In addition to regular wages, each laborer receives 1 dinar per hour as a clothing allowance. However, after deductions for various insurances and party contributions the workers wages do not cover the goods he is entitled to buy. An industrial director with a monthly income of 5,000 dinars, who forfeits 600 for various contributions, has barely enough left for food.
